

Dear Recruiter,

I am studying Computer Programming & Analysis at Humber College and I am looking for a 4 or 8 month co-op term placement for the fall 2024 and winter 2025 term.

I believe that my skills and experience in full-stack development, database management and programming as well as skills with computers and related technologies will be very helpful. It is something I truly enjoy and something that I know will be helpful everywhere I go.

Most recently, I completed a co-op with a cloud-computing, cybersecurity and infrastructure management company called Simnet as a web developer. In my time there, I have proved my skills with HTML, CSS, Javascript and Javascript libraries and frameworks such as Node.js, Express.js and React.js.

I am great at managing my time, learning new things, problem solving and communicating with my coworkers. The combination of these skills allows me to work efficiently and meet expectations.

I would appreciate the opportunity to meet in-person or virtually and discuss my skills further.

Thank you.
